skill IT
EDUCATION

AI Engineer

PROGRAM BROCHURE

Industry-Ready Skills

Hands-on Learning

Career Support

Future-Focused Growth

Your Career | Our Commitment

Our mission is to equip learners with practical, industry-ready AI skills that enable successful and future-focused careers.

TABLE OF CONTENTS

Skill IT Education

4+ Years of Excellence ★ **10k+** Learners

योगः कर्मसु कौशलम्

IIT PATNA

Recognized for Excellence in Professional Education & Training

NASSCOM®

NASSCOM

Aligned with Industry Standards to Bridge the Skill Gap

SKILL IT INTERNSHIP CERTIFICATE

Awarded for Successful Completion of Real-time Internship

INDUSTRY RECOGNITION

Trusted by Learners and Industry Professionals

LEARNER TRUST

Built on Trust, Transparency and Quality Education

CAREER FOCUSED

Empowering Learners to Build Future-ready Careers

WHY Skill IT?

TOP 4 REASONS

1

Curriculum aligned with Industry
Syllabus aligned with industry as per global accreditation bodies

IABAC | MINISTRY OF ELECTRONICS & INFORMATION TECHNOLOGY GOVERNMENT OF INDIA | NASSCOM®

2

Ashok Veda as Mentor
Be mentored by industry-leading AI and Data Science experts committed to your career success

linkedin.com/in/ashokveda/

3

Realtime Internship
Gain real-world experience through internship opportunities in Analytics, Data Science, and Artificial Intelligence.

4

Top Placement records
Launch your career with confidence through our dedicated placement support and expert career guidance

KEY HIGHLIGHTS

1. Flexible Learning
Learners can repeat sessions, change batches , change learning modes, ad-hoc doubts sessions anytime.

2. Placement Assistance
A dedicated Career Assistance Team supports learners throughout their career journey, helping them achieve successful placements

3. Life-Time Access
Enjoy lifetime access to learning resources, enabling continuous learning and skill enhancement beyond course completion

4. Exclusive Practice Lab
Get exclusive access to an AI & Data Science Virtual Lab to practice concepts through hands-on learning

5. Job-oriented circular
Our curriculum is designed by industry experts to meet current market demands and prepare learners for successful careers

6. Elite Mentors
Learn from elite mentors and experienced faculty with real-world expertise from leading companies and premier institutions

7. Unlimited Projects
Unlimited projects with flexibility to choose from various industries but a minimum of 5 projects are required to complete projects phase.

8. Learning Community
Join an exclusive online learning community with active learners, mentors, and alumni for continuous guidance and support.

REAL-TIME INTERNSHIP

REAL-WORLD EXPERIENCE THROUGH INTERNSHIPS & INDUSTRY PROJECTS

At Skill IT Education, learners gain practical experience by working on real-world industry projects and hands-on assignments aligned with current market requirements.

Our project-based learning approach enables learners to apply classroom concepts to real business scenarios under the guidance of experienced mentors and industry professionals. This practical exposure helps build technical expertise, problem-solving abilities, and the confidence required for successful careers in the IT industry.

internship@skillit.com

JOB READY PROGRAM

COMPLETE CAREER TRANSITION SUPPORT

Skill IT Education's Placement Assistance Team works closely with every learner, offering personalized career guidance, interview preparation, and placement support to ensure a smooth transition into the IT industry

Our Top Hiring Partners

Skill IT Education has a strong network of **1000+** hiring partners

Microsoft	Google	amazon	IBM
Deloitte.	accenture	cognizant	tcs TATA CONSULTANCY SERVICES
Infosys	wipro	HCL	Capgemini
LTIMindtree	Tech Mahindra	Mphasis The Next Applied	Mindtree
LTI Let's Solve	virtusa Accelerating Business Outcomes	HTC global services	UST
zeta	innovaccer	haptik	yellow.ai
valueleaf Unlock Value	sigmoid	Darwinbox	freshworks
Agira Innovation Engineered	Incture	ACE Software n Systems	Ramco
KPIT	knôldus	Aricent	YASH Technologies

PROGRAM CURRICULUM

ARTIFICIAL INTELLIGENCE ENGINEER - COURSE BUNDLE

- Skill IT Education AI Engineer – Course Bundle is one of the **world's most popular, comprehensive, job-oriented, advanced** AI courses designed to help learners build future-ready careers.
- The course is **rigorously updated** as per industry requirements and fine-tuned to make the learning process structured and effective for real-world applications.

LEARNING HOURS
320 Hrs

TOTAL DURATION
8 Months

ADD-ON
Internship, Placements

S.NO	COURSE	LEARNING HOURS
1	Data Science Foundation	16 Hrs
2	Python Foundation	32 Hrs
3	Statistics Essentials	16 Hrs
4	Database: SQL and MongoDB	32 Hrs
5	Version Control with Git	16 Hrs
6	Big Data Foundation	16 Hrs
7	Certified Business Intelligence (BI) Analyst	16 Hrs
8	Machine Learning Associate	32 Hrs
9	Machine Learning Expert	32 Hrs
10	Advanced Data Science	32 Hrs
11	AI Foundation	16 Hrs
12	AI Expert	64 Hrs

DATA SCIENCE FOUNDATION

PREREQUISITES
Python Foundation

LEARNING HOURS
16 Hrs

LEVEL 1
DATA SCIENCE ESSENTIALS

- Data Science Terminologies
- Big Data Vs Data Science
- Introduction to Data Science
- Data Science vs Analytics
- Evolution of Data Science
- Data Science vs AI/Machine Learning

LEVEL 2
DATA SCIENCE DEMO

- Data Preparation
- Prediction with ML model
- Machine learning Model building
- Business Requirement: Use Case
- Delivering Business Value

LEVEL 3
ANALYTICS CLASSIFICATION

- Types of Analytics
- EDA and insight gathering demo in Tableau
- Predictive Analytics
- Descriptive Analytics
- Diagnostic Analytics
- Prescriptive Analytics

LEVEL 4
DATA SCIENCE AND RELATED FIELDS

- Introduction to Natural Language Processing
- Introduction to Computer Vision
- Introduction to AI
- Introduction to GAN
- Introduction to Reinforcement Learning
- Introduction to Generative Passive Models

LEVEL 5
DATA SCIENCE ROLES & WORKFLOW

- Data Science Project workflow
- Roles: Data Engineer, Data Scientist, ML Engineer and MLOps Engineer
- Data Science Project stages.

LEVEL 6
MACHINE LEARNING INTRODUCTION

- Supervised Vs Unsupervised
- What Is ML? ML Vs AI
- Clustering, Classification And Regression
- ML Workflow, Popular ML Algorithms

LEVEL 7
DATA SCIENCE INDUSTRY APPLICATIONS

- Data Science in Health Care
- Data Science in Retail
- Data Science in Finance and Banking
- Data Science in Technology Industry
- Data Science in Logistics and Supply Chain
- Data Science in Manufacturing
- Data Science in Agriculture

TOOLS/PLATFORMS COVERED

python | R | pandas | matplotlib | NumPy

PYTHON FOUNDATION

PREREQUISITES
None

LEARNING HOURS
32 Hrs

LEVEL 1
PYTHON BASICS

- Installation of Python and IDE
- Number & Booleans, strings
- Arithmetic Operators
- Python basic data types
- Introduction of python
- Python Variables
- Comparison Operators
- Assignment Operators

LEVEL 2
PYTHON CONTROL STATEMENTS

- IF-ELSE
- FOR statements
- Python Loops basics
- IF Conditional statement
- WHILE Statement
- NESTED IF
- BREAK and CONTINUE statements

LEVEL 3
PYTHON DATA STRUCTURES

- List: Object, methods
- Dictionary: Object, methods
- Sets: Object, methods
- Tuple: Object, methods
- Basic data structure in python

LEVEL 4
PYTHON FUNCTIONS

- Lambda functions
- Functions basics
- Function Parameter passing
- Map, reduce, filter functions

TOOLS/PLATFORMS COVERED

python | Google colab | ANACONDA | NumPy | Pandas

STATISTICS ESSENTIALS

PREREQUISITES
None

LEARNING HOURS
20 hrs.

LEVEL 1
OVERVIEW OF STATISTICS

- Types Of Data
- Basic Terms Of Statistics
- Descriptive And Inferential Statistics
- Introduction to Statistics

LEVEL 2
HARNESSING DATA

- Systematic Random Sampling
- Sampling Error
- Methods Of Collecting Data
- Types of Sampling
- Cluster Random Sampling
- Sampling With Replacement And Without Replacement
- Random Sampling
- Stratified Random Sampling
- Cochran's Minimum Sample Size
- Simple Random Sampling
- Multi stage Sampling

LEVEL 3
EXPLORATORY DATA ANALYSIS

- Measures Of Distance: Euclidean, Manhattan And Minkowski Distance
- Normal Distribution & Properties
- Data Distribution Plot: Histogram
- Measures Of Central Tendencies: Mean,Median And Mode
- Measures Of Central Tendencies: Range, Variance And Standard Deviation
- Z Value / Standard Value
- Skewness & Kurtosis
- Normality Testing
- Covariance & Correlation
- Empherical Rule and Outliers
- Exploratory Data Analysis Introduction
- Central Limit Theorem

LEVEL 4
HYPOTHESIS TESTING

- Types of Hypothesis Testing
- Two Sample Relation T-test
- Hypothesis Testing Introduction
- Hypothesis Testing Errors : Type I And Type II
- P- Value, Critical Region
- Application of Hypothesis testing
- One Way Anova Test
- Two Sample Independent T-test

MACHINE LEARNING ASSOCIATE

PREREQUISITES
Python Foundation, DSF

LEARNING HOURS
40 Hrs

LEVEL 1
MACHINE LEARNING INTRODUCTION
- Clustering, Classification And Regression
- What Is ML? ML Vs AI
- Supervised Vs Unsupervised
- Regression

LEVEL 2
PYTHON NUMPY PACKAGE
- Matrix Operations, Broadcasting in Arrays
- Introduction to Numpy Package
- Core Numpy functions
- Array as Data Structure

LEVEL 3
PYTHON PANDAS PACKAGE
- Data munging with Pandas
- Series in Pandas
- Introduction to Pandas package
- File Reading in Pandas
- Data Frame in Pandas

LEVEL 4
VISUALIZATION WITH PYTHON - Matplotlib
- Visualization Packages (Matplotlib)
- Components Of A Plot, Sub-Plots
- Basic Plots: Line, Bar, Pie, Scatter

LEVEL 5
PYTHON VISUALIZATION PACKAGE - SEABORN
- Seaborn: Basic Plot
- Advanced Python Data Visualizations

LEVEL 6
ML ALGO: LINEAR REGRESSION
- How it works: Regression and Best Fit Line
- Introduction to Linear Regression
- Modeling and Evaluation in Python

LEVEL 7
ML ALGO: LOGISTIC REGRESSION
- Modeling and Evaluation in Python
- How it works: Classification & Sigmoid Curve
- Introduction to Logistic Regression

LEVEL 8
ML ALGO: K MEANS CLUSTERING
- Modeling in Python
- How it works : K Means theory
- K Means Algorithm
- Understanding Clustering (Unsupervised)

LEVEL 9
ML ALGO: KNN
- Introduction to KNN
- Modeling and Evaluation in Python
- How It Works: Nearest Neighbor Concept

TOOLS/PLATFORMS COVERED

scikit learn · NumPy · pandas · python · Google colab · matplotlib

MACHINE LEARNING EXPERT

PREREQUISITES
Python Foundation, DSF

LEARNING HOURS
40 Hrs

LEVEL 1

FEATURE ENGINEERING

- Creation of Pipeline
- Introduction to Feature Engineering
- Feature Engineering Techniques: Encoding, Scaling, Data Transformation
- Handling Missing values, handling outliers
- Use case for feature engineering

LEVEL 2

ML ALGO: SUPPORT VECTOR MACHINE (SVM)

- How It Works: SVM Concept, Kernel Trick
- Introduction to SVM
- Modeling and Evaluation of SVM in Python
- How it works: SVM Concept, Kernel Trick

LEVEL 3

PRINCIPAL COMPONENT ANALYSIS (PCA)

- Modeling PCA in Python
- Building Blocks Of PCA
- How it works: Finding Principal Components

LEVEL 4

ML ALGO: DECISION TREE

- How it works
- Modeling and Evaluation in Python
- Introduction to Decision Tree & Random Forest

LEVEL 5

ENSEMBLE TECHNIQUES - BAGGING

- Bagging and How it works
- Modeling and Evaluation in Python
- Introduction to Ensemble technique

LEVEL 6

ML ALGO: NAÏVE BAYES

- Naive Bayes For Text Classification
- Introduction to Naive Bayes
- Modeling and Evaluation in Python
- How it works: Bayes' Theorem

LEVEL 7

GRADIENT BOOSTING, XGBOOST

- How it works?
- Introduction to Boosting and XGBoost
- Modeling and Evaluation of in Python

TOOLS/PLATFORMS COVERED

Google colab | python | scikit-learn | PyCharm

ADVANCED DATA SCIENCE

PREREQUISITES
Python Foundation, MLE, DSF

LEARNING HOURS
40 Hrs

LEVEL 1
TIME SERIES FORECASTING - ARIMA

- Moving Average Model (MA)
- ARIMA Model
- Trend, Seasonality, cyclical and random
- Autoregressive Model (AR)
- Time Series Analysis in Python
- Stationarity of Time Series
- Autocorrelation and AIC
- What is Time Series?

LEVEL 2
SENTIMENT ANALYSIS

- Case study: Sentiment Analysis on Movie Reviews
- NLTK Package
- Introduction to Sentiment Analysis
- Case study: Sentiment Analysis on Movie Reviews
- Introduction to Sentiment Analysis

LEVEL 3
REGULAR EXPRESSIONS WITH PYTHON

- Regex codes
- Text extraction with Python Regex
- Regex Introduction

LEVEL 4
ML MODEL DEPLOYMENT WITH FLASK

- URL and App routing
- Flask application – ML Model deployment
- Introduction to Flask

LEVEL 5
ADVANCED DATA ANALYSIS WITH MS EXCEL

- Pivot Table
- MS Excel core Functions
- Data Table
- Advanced Functions (VLOOKUP, INDIRECT..)
- Linear Regression with EXCEL
- Goal Seek Analysis
- Solving Data Equation with EXCEL

LEVEL 6
AWS CLOUD FOR DATA SCIENCE

- Introduction of cloud
- AWS Service (EC2 instance)
- Difference between GCC, Azure,AWS

LEVEL 7
AZURE FOR DATA SCIENCE

- Data Pipeline
- ML modeling with Azure
- Introduction to AZURE ML studio

LEVEL 8
INTRODUCTION TO DEEP LEARNING

- Artificial Neural Network in Python
- Introduction to Artificial Neural Network, Architecture
- Convolutional Neural Network in Python
- Introduction to Convolutional Neural Network, Architecture

TOOLS/PLATFORMS COVERED

python | Google colab | ANACONDA | NumPy | Pandas

DATABASE: SQL AND MONGODB

PREREQUISITES
None

LEARNING HOURS
40 Hrs

LEVEL 1
DATABASE INTRODUCTION

- CRUD operations
- Relational Database Management System
- DATABASE Overview
- Key concepts of database management

LEVEL 2
SQL BASICS

- SQL Commands
- MY SQL workbench installation
- Introduction to SQL
- Introduction to Databases

LEVEL 3
DATA TYPES AND CONSTRAINTS

- Primary key, Foreign key, Not null
- Unique, Check, default, Auto increment
- Numeric, Character, date time data type

LEVEL 4
DATABASES AND TABLES (MySQL)

- Create database
- Create table, Rename table
- Show and use databases
- Create new table from existing data types
- Insert into, Update records
- Delete table, Delete table records
- Alter table

LEVEL 5
SQL JOINS

- Create database
- Show and use databases
- Create table, Rename table
- Create new table from existing data types
- Insert into, Update records
- Alter table
- Delete table, Delete table records
- Delete database

LEVEL 6
SQL COMMANDS AND CLAUSES

- Select, Select distinct
- Relational operators, Logical
- Aliases, Where clause
- Between, Order by, In
- Like, Limit, null/not null, group by
- Having, Sub queries

LEVEL 7
DOCUMENT DB/NO-SQL DB

- Introduction of Document DB
- MongoDB basics
- Document DB vs SQL DB
- Popular Document DBs
- Data format and Key methods

TOOLS/PLATFORMS COVERED

MySQL mongoDB

VERSION CONTROL WITH GIT

PREREQUISITES
None

LEARNING HOURS
20 Hrs

LEVEL 1
GIT INTRODUCTION
- Git Workflow
- Git Architecture
- Purpose of Version Control
- Git Distribution Version Control
- Popular Version control tools
- Terminologies

LEVEL 2
GIT REPOSITORY and GitHub
- Create New Repo with Init command
- Git Essentials: Copy & User Setup
- Mastering Git and GitHub
- Git Repo Introduction

LEVEL 3
COMMITS, PULL, FETCH AND PUSH
- Git Essentials: Copy & User Setup
- Git Repo Introduction
- Create New Repo with Init command
- Mastering Git and GitHub

LEVEL 4
TAGGING, BRANCHING AND MERGING
- Checkout branch
- Merge branches
- Tagging, Branching and Merging
- Organize code with branches

LEVEL 5
UNDOING CHANGES
- Git reset and revert
- Editing Commits
- Commit command Amend flag

LEVEL 6
GIT WITH GITHUB AND BITBUCKET
- Collaborating with other developers
- Local and Remote Repo
- Bitbucket Git account
- Creating GitHub Account

TOOLS/PLATFORMS COVERED

GitHub | ATLASSIAN Bitbucket | git

BIG DATA FOUNDATION

PREREQUISITES
Python Foundation

LEARNING HOURS
20 Hrs

LEVEL 1
BIG DATA INTRODUCTION

- Big Data Overview
- Components of Hadoop Ecosystem
- Five Vs of Big Data
- Introduction to Hadoop
- What is Big Data and Hadoop
- Big Data Analytics Introduction

LEVEL 2
HDFS AND MAP REDUCE

- HDFS – Big Data Storage
- Key Terms: Output Format, Partitions, Combiners, Shuffle, and Sort
- Mapping and reducing stages concepts
- Distributed Processing with Map Reduce

LEVEL 3
PYSPARK FOUNDATION

- PySpark Introduction
- Spark Configuration
- Aggregating Data with Pair RDDs
- Working with RDDs in PySpark
- Resilient distributed datasets (RDD)

LEVEL 4
SPARK SQL AND HADOOP HIVE

- Introducing Spark SQL
- Spark SQL vs Hadoop Hive
- Hadoop Hive

TOOLS/PLATFORMS COVERED

CERTIFIED BI ANALYST

PREREQUISITES
None

LEARNING HOURS
20 Hrs

LEVEL 1

TABLEAU FUNDAMENTALS

- Create Calculated Fields
- Bar chart, Tree Map, Line Chart
- Introduction to Business Intelligence & Introduction to Tableau
- Create Custom Hierarchies
- Dashboards creation, Quick Filters
- Interface Tour, Data visualization: Pie chart, Column chart, Bar chart.
- Area chart, Combination Charts, Map
- Create Table Calculations

LEVEL 2

POWER-BI BASICS

- Basic Data Cleaning
- Basics Visualizations
- Basic DAX FUNCTION
- Power BI Introduction
- Dashboard Creation

LEVEL 3

DATA TRANSFORMATION TECHNIQUES

- Changing Data Types
- Data Cleansing and Manipulation:
- Exploring Query Editor
- Editing Rows
- Creating Our Initial Project File
- Connecting to Our Data Source
- Replacing Values

LEVEL 4

CONNECTING TO VARIOUS DATA SOURCES

- Splitting and Merging Columns
- Creating Columns from Examples
- Connecting to a Webpage
- Connecting to a CSV File
- Create Data Model
- Extracting Characters
- Creating Conditional Columns

TOOLS/PLATFORMS COVERED

Power BI

tableau

ARTIFICIAL INTELLIGENCE FOUNDATION

PREREQUISITES
Python Foundation, DSF

LEARNING HOURS
20 Hrs

LEVEL 1
AI VS DATA SCIENCE VS MACHINE LEARNING

- Why Artificial Intelligence Now?
- Areas Of Artificial Intelligence
- History Of Artificial Intelligence
- AI Vs Data Science Vs Machine Learning
- Evolution Of Human Intelligence
- What Is Artificial Intelligence?

LEVEL 2
DEEP LEARNING INTRODUCTION

- Applications of Deep Learning Networks
- Machine Learning vs Deep Learning
- Deep Neural Network
- Feature Learning in Deep Networks

LEVEL 3
TENSORFLOW FOUNDATION

- TensorFlow Structure and Modules
- Hands-On: ML modeling with TensorFlow

LEVEL 4
COMPUTER VISION INTRODUCTION

- Hands-On: Cat vs Dogs Classification with CNN Network
- Image Classification with CNN
- Image Basics
- Convolution Neural Network (CNN)
- Image Classification with CNN Network

LEVEL 5
NATURAL LANGUAGE PROCESSING (NLP)

- Hands-On: BERT Algorithm
- NLP Introduction
- Word Embedding
- Bag of Words Models

LEVEL 6
AI ETHICAL ISSUES AND CONCERNS

- Ai And Bias
- Ai And Ethical Concerns
- Issues And Concerns Around Ai
- Ai: Ethics, Bias, And Trust

TOOLS/PLATFORMS COVERED

TOOLS/PLATFORMS COVERED

Google BERT

TensorFlow

ARTIFICIAL INTELLIGENCE(AI) EXPERT

PREREQUISITES
ML knowledge, Python

LEARNING HOURS
80 Hrs

LEVEL 1
NEURAL NETWORKS

- Feed forward algorithm
- Neural network - core concepts(Weight initialization)
- Neural network - core concepts(MSE & RMSE)
- Neural network - core concepts(Optimizer)
- Neural network - core concepts(Need of activation)
- Structure of neural networks
- Backpropagation

LEVEL 2
IMPLEMENTING DEEP NEURAL NETWORKS

- Simple deep learning model in Keras (tf2.X)
- Building neural network model in TF2.0 for MNIST dataset
- Introduction to neural networks with tf2.X

LEVEL 3
DEEP COMPUTER VISION - CNN

- CNNs with Keras
- Convolutional neural networks (CNNs)
- Transfer learning in CNN
- Examining x-ray with CNN model
- Flowers dataset with tf2.X

LEVEL 4
DEEP COMPUTER VISION - OBJECT DETECTION

- YOLO Implementation
- RCNN
- Faster RCNN
- SSD
- Object detection using cv2
- What is Object detection
- Bounding Box regression
- Methods of Object Detections
- Metrics of Object detection
- labelimg

LEVEL 5
RECURRENT NEURAL NETWORK

- Sequences with RNNs
- RNN introduction, - Sequences with RNNs
- Bi-directional RNN and LSTM
- Long short-term memory networks
- Examples of RNN applications

TOOLS/PLATFORMS COVERED

aws | TensorFlow | Amazon SageMaker

ARTIFICIAL INTELLIGENCE(AI) EXPERT- Cont

PREREQUISITES
ML knowledge, Python

LEARNING HOURS
80 Hrs

LEVEL 6
NATURAL LANGUAGE PROCESSING (NLP)
- Introduction to regex
- Introduction to Natural language processing
- RNN model creation
- Working with Text file
- Transformers and BERT
- State of art NLP and projects
- Introduction to GPT (Generative Pre-trained Transformer)
- Working with pdf file
- Word Embedding

LEVEL 7
PROMPT ENGINEERING
- Applications of Prompt Engineering in Natural Language Processing
- Design Principles for Effective Prompts
- Techniques for Generating and Optimizing Prompts
- Introduction to Prompt Engineering
- Understanding the Role of Prompts in AI Systems

LEVEL 8
REINFORCEMENT LEARNING
- Model-based method
- Dynamic programming model free methods
- Fundamental equations in RL
- Markov decision process

LEVEL 9
DEEP REINFORCEMENT LEARNING
- Architectures of deep Q learning
- Deep Q learning
- Reinforcement Learning Projects with OpenAI Gym

LEVEL 10
GEN AI
- Building a Question answer bot with the models on Hugging Face
- Introduction to GPT (Generative Pre-trained Transformer)
- Core concepts of GAN
- Gan introduction, Core Concepts, and Applications
- GAN applications
- Building GAN model with TensorFlow 2.X

LEVEL 11
AUTOENCODERS
- Types of Autoencoders: Vanilla, Denoising, Variational, Sparse, and Convolutional Autoencoders
- Applications of Autoencoders: Dimensionality Reduction, Anomaly Detection, Image
- Introduction to Autoencoders
- Training Autoencoders: Loss Functions, Optimization Techniques
- Basic Structure and Components of Autoencoders

TOOLS/PLATFORMS COVERED

aws | TensorFlow | Amazon SageMaker
