Cyber Security

PROGRAM BROCHURE

Industry-Ready Skills

Learn in-demand cyber security skills from industry experts.

Hands-on Learning

Work on real-world projects and practical simulations.

Career Support

Get guidance, resume support, and interview preparation.

Future-Focused Growth

Stay ahead with emerging technologies and continuous learning.

Our Commitment to Your Success

We are committed to empowering you with the knowledge, practical skills, and confidence to build a secure digital future and achieve your career goals in cyber security.

Skill IT Education

4+ Years of Excellence

★ **10k+** Learners

योग: स्वयंसेवा शीक्षा

IIT PATNA

Recognized for Excellence in
Professional Education & Training

NASSCOM®

NASSCOM

Aligned with Industry Standards
to Bridge the Skill Gap

SKILL IT INTERNSHIP CERTIFICATE

Awarded for Successful Completion
of Real-time Internship

INDUSTRY RECOGNITION

Trusted by Learners and
Industry Professionals

LEARNER TRUST

Built on Trust, Transparency
and Quality Education

CAREER FOCUSED

Empowering Learners to Build
Future-ready Careers

EDUCATION

WHY Skill IT?

TOP 4 REASONS

1

Curriculum aligned with Industry

Syllabus aligned with industry as per global accreditation bodies

MINISTRY OF
ELECTRONICS &
INFORMATION TECHNOLOGY
GOVERNMENT OF INDIA

NASSCOM®

2

Ashok Veda as Mentor

Be mentored by industry-leading AI and Data Science experts committed to your career success

[linkedin.com/in/ashokveda/](https://www.linkedin.com/in/ashokveda/)

3

Realtime Internship

Gain real-world experience through internship opportunities in Analytics, Data Science, and Artificial Intelligence.

4

Top Placement records

Launch your career with confidence through our dedicated placement support and expert career guidance

KEY HIGHLIGHTS

1. Flexible Learning

Learners can repeat sessions, change batches, change learning modes, ad-hoc doubts sessions anytime.

2. Placement Assistance

A dedicated Career Assistance Team supports learners throughout their career journey, helping them achieve successful placements

3. Life-Time Access

Enjoy lifetime access to learning resources, enabling continuous learning and skill enhancement beyond course completion

4. Exclusive Practice Lab

Get exclusive access to an AI & Data Science Virtual Lab to practice concepts through hands-on learning

5. Job-oriented circular

Our curriculum is designed by industry experts to meet current market demands and prepare learners for successful careers

6. Elite Mentors

Learn from elite mentors and experienced faculty with real-world expertise from leading companies and premier institutions

7. Unlimited Projects

Unlimited projects with flexibility to choose from various industries but a minimum of 5 projects are required to complete projects phase.

8. Learning Community

Join an exclusive online learning community with active learners, mentors, and alumni for continuous guidance and support.

EDUCATION

JOB READY PROGRAM

COMPLETE CAREER TRANSITION SUPPORT

Skill IT Education's Placement Assistance Team works closely with every learner, offering personalized career guidance, interview preparation, and placement support to ensure a smooth transition into the IT industry

REAL-TIME INTERNSHIP

REAL-WORLD EXPERIENCE THROUGH INTERNSHIPS & INDUSTRY PROJECTS

At Skill IT Education, learners gain practical experience by working on real-world industry projects and hands-on assignments aligned with current market requirements.

Our project-based learning approach enables learners to apply classroom concepts to real business scenarios under the guidance of experienced mentors and industry professionals. This practical exposure helps build technical expertise, problem-solving abilities, and the confidence required for successful careers in the IT industry.

PROGRAM CURRICULUM

CYBER SECURITY - COURSE BUNDLE

- Skill IT Education Cyber Security – Course Bundle is one of the **world's most popular, comprehensive, job-oriented, advanced** cybersecurity courses designed to help learners build future-ready careers.
- The course is **rigorously updated** as per industry requirements and fine-tuned to make the learning process structured and effective for real-world applications.

LEARNING HOURS

180 Hrs

TOTAL DURATION

5 Months

ADD-ON

Internship, Placements

LEARNING HOURS	COURSE	HOURS
1	Cybersecurity and Ethical Hacking Fundamentals	20 Hrs
2	Cyber Security Professional	60 Hrs
3	Penetration Testing	80 Hrs
4	Artificial Intelligence in Cyber Security	20 Hrs

CYBER SECURITY AND ETHICAL HACKING FUNDAMENTALS

PREREQUISITES

None

LEARNING HOURS

20 Hrs

MODULE 1

INTRODUCTION TO CYBER SECURITY

- Cyber Security vs Information security
- Types of Hackers
- Linux Commands overview
- Network Topologies
- Cyber Laws

MODULE 2

NETWORKING FUNDAMENTALS FOR HACKERS

- Network vs Networking
- Phases of Ethical Hacking
- Windows Commands Overview
- IP & MAC
- Security Policies in an Organisation

MODULE 3

DLINUX, WINDOWS & VIRTUAL LAB SETUP

- Virtualbox Installation
- Kali linux Installation
- OSI MODEL
- Cyber Kill Chain Concept
- Ports and Protocols

MODULE 4

LINUX & WINDOWS COMMANDS

- Linux Commands overview
- Vuln server installation
- Windows installation
- 3 Way Handshake & 2 Way Handshake
- Networking Devices

skill IT
EDUCATION

CYBER SECURITY PROFESSIONAL

PREREQUISITES

None

LEARNING HOURS

60 Hrs

LEVEL 1

INFORMATION GATHERING & OSINT

- Introduction to Reconnaissance and Intelligence Gathering
- Port Scanning Techniques
- WHOIS and Registration Records
- CVSS
- Technology Stack Identification
- SMTP Enumeration
- Reconnaissance Automation Tools

LEVEL 2

PSCANNING NETWORKS

- Basic Scanning
- Open-Source Intelligence (OSINT) Techniques
- CVE
- Search Engine Intelligence Collection
- FTP Enumeration
- Bypassing Techniques
- Vulnerability assessment using automated tools

LEVEL 3

ENUMERATION TECHNIQUES

- FTP Enumeration
- Domain Registration Analysis
- Advanced Scanning Techniques
- CWE,NIST,NVD Overview
- Email Discovery and Verification Techniques
- SMB Enumeration
- Passive vs Active Reconnaissance

LEVEL 4

ENUMERATION TECHNIQUES

- FTP Enumeration
- Domain Registration Analysis
- Advanced Scanning Techniques
- CWE,NIST,NVD Overview
- Email Discovery and Verification Techniques
- SMB Enumeration
- Passive vs Active Reconnaissance

None

LEARNING HOURS

20 Hrs

LEVEL 5

SYSTEM HACKING

- Windows Hacking
- Different Types of Malwares
- Packet Analysis
- Phases of Social Engineering
- Server Hacking

LEVEL 6

MALWARE THREATS FUNDAMENTALS

- Malware Concepts
- Windows Login Bypass
- Social Engineering Concepts
- Malware Creation using kali tools
- Anti Malware Softwares

LEVEL 7

MALWARE THREATS FUNDAMENTALS

- Malware Concepts
- Windows Login Bypass
- Social Engineering Concepts
- Malware Creation using kali tools
- Anti Malware Softwares

LEVEL 8

SOCIAL ENGINEERING ATTACKS

- Social Engineering Concepts
- Windows Hacking
- Types of Social Engineering
- Malware Concepts
- Social Media Hacking

PENETRATION TESTING

LEVEL 1

DENIAL OF SERVICE & DISTRIBUTED DOS

- DOS/DDOS Concepts
- Hacking premium accounts
- Firewall Configuration
- Web Application Concepts
- Wireless Encryption
- Active directory attacks

LEVEL 2

SESSION HIJACKING

- Session Hijacking Concepts
- Types of SQL Injection
- Web Server Attack Tools
- Cloud Security Concepts
- Cookies stealing
- Firewall,IDS,IPS & Honeypot Overview

LEVEL 3

IDS, IPS, FIREWALL & HONEYPOT EVASION

- Firewall,IDS,IPS & Honeypot Overview
- WiFi Attack
- Web Server Concepts
- Active Directory Concepts
- Types of SQL Injection Tools
- Cross site scripting

LEVEL 4

WEB APPLICATION SECURITY TESTING

- Web Server Concepts
- DOS/DDOS Attack Techniques
- Wireless Concepts
- Web Application Attacks
- Active directory attacks
- Cloud Security Concepts

LEVEL 5

SQL INJECTION ATTACKS

- SQL Injection Concepts
- Web Application Concepts
- Different types of cloud services
- Cookies stealing
- Firewall Configuration
- Web Server Attack and Methodology

LEVEL 6

WIRELESS NETWORK SECURITY

- Wireless Concepts
- SQL Injection Concepts
- Cloud Security Concepts
- Web Application Attacks
- Session Hijacking Concepts
- WiFi Attack

LEVEL 7

ACTIVE DIRECTORY SECURITY FUNDAMENTALS

- Active Directory Concepts
- Dos/DDOS Attack Techniques
- Types of SQL Injection
- Web Server Attack and Methodology
- Wireless Encryption
- Cloud Security Concepts

LEVEL 8

CLOUD SECURITY & CLOUD ATTACKS

- Cloud Security Concepts
- Session Hijacking Concepts
- Different types of cloud services
- Types of SQL Injection Tools
- Web Application Testing
- Attacks

PENETRATION TESTING

AI IN CYBER SECURITY

LEVEL 1

AI IN CYBER SECURITY & AI SECURITY RISKS

- AI & Machine Learning Fundamentals
- Vulnerability Classification & CVSS Scoring
- Exploitation & Post-Exploitation Techniques
- Network Security Assessment

LEVEL 2

PENETRATION TESTING METHODOLOGY

- Planning, Scope & Reconnaissance
- AI-Powered Threat Detection and Prevention
- Client Reporting & Remediation Recommendations
- Vulnerability Analysis Using Industry Tools

LEVEL 3

PROFESSIONAL REPORTING & DOCUMENTATION

- Writing Executive & Technical Reports
- Scanning, Enumeration & Vulnerability Assessment
- Securing AI Systems and Best Practices
- Final Project Execution & Professional Report Submission

LEVEL 4

REAL TOOL BASED PROJECT

- Web Application Penetration Testing
- Proof of Concept (PoC) Documentation
- Reporting, Remediation & Retesting
- AI Security Risks & Adversarial Attacks
